## Seal Policy

Several of our shipper clientele have implemented policies regarding the sealing of truckload containers. Procedures for these policies vary somewhat from shipper to shipper.

### Policy:

1. All truckloads must have a security numbered seal.
2. The seal must be attached in the presence of a shipper employee, and the number must be noted on the shipper's manifest.
3. The seal must be broken only by the receiver's personnel, **NOT** by the carrier.
4. In the event the carrier has cause to check the load in transit (such as possible load shift, etc.), the carrier must call Johanson Transportation Service to request permission to break the seal. If after hours, the carrier must call the on-call person for Johanson. Once the load has been checked, it must be resealed and noted on the shipping manifest. The new seal number must also be conveyed to JTS.
5. If the seal is broken by a law enforcement authority for safety inspection, border crossing, weigh station, suspected violation, or similar cause the following procedures must be followed:
  - a. Carrier must note on the bill of lading the time, date, location, seal number, and reason for breaking of seal.
  - b. If the seal must be broken, the carrier is responsible to have the authorities note on the bill of lading that the seal was broken in their presence.
  - c. The carrier is responsible to have the authorities reseal the truck with their authorized government seal and identify the new number on the bill of lading.
  - d. The carrier must also immediately call Johanson Transportation Service at 800 742-2053 and inform of the situation. If after hours, ask for the on-call person.

If upon delivery the trailer seal has been broken and the above procedures have not been followed, the receiver may consider the product adulterated, the shipment may be refused, and the carrier may be liable for the full value of the shipment.
