ATTENTION!

> [You / Your driver] is picking up a shipment for Pepsi Beverages. In most cases, the driver will be allowed on the shipping dock and is responsible for counting the product and notating it on the BOL.

At the very least the driver must count the # of pallets being shipped, make sure the shrink wrap is tight, and mark the count on the bills.

On the BOL, Trailer Loaded by and Freight Counted by must be checked.

Trailer Loaded:	Freight Counted:	
By Shipper	By Shipper	
By Driver	By Driver/pallets said to	
	By Driver/Pieces	

**BOTH COPIES OF THE BOL/PAPERWORK MUST BE SIGNED (BOTH DRIVER & SHIPPER COPIES).

- ➤ If [You / Your driver] is NOT allowed on the dock to count, The BOL's MUST be marked "Shipper Load & Count" ("SLC") and notify ROAR Logistics ASAP.
- ➤ If the bills are not marked appropriately (as stated) and the load delivers short, you/your company will be claimed and/or short paid the value of the product even if the Seal is marked "In Tact".

TRAILER SEAL PROTOCOL AND SAFETY MEASURES

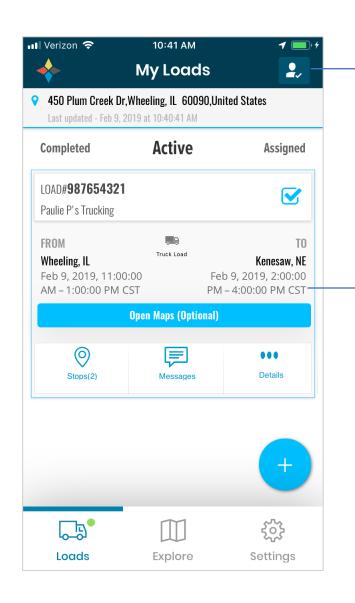

Only authorized personnel can remove the seal(s) upon arrival to the destination site unless required by in-transit inspections (DOT or other regulatory agencies, including but not limited to law enforcement) or special requirements known to ROAR Logistics.

The use of key or combination locks in lieu of seals for transported materials does not constitute a sealed load. All loads must have a seal(s) securing the vehicle during transport.

If the seal is broken in the event of an in-transit regulatory inspection (DOT, Ag Dept., law enforcement, etc.) or the driver believes the load has shifted and needs to be inspected and secured, the Carrier's driver must have additional seals with him and must reseal the door(s) after the inspection is completed and record the new seal numbers on the transport documents. Such procedures should be avoided, except in circumstances where that safe transport of the cargo is at issue. In such instances, Carrier must call ROAR Logistics in advance of removing the seal (if possible, without compromising safety) so that potential removal of the seal can be coordinated with the shipper or other party in interest. After affixing the seal, the driver must also record the date, time and circumstances surrounding the in-transit regulatory inspection on the transport documents.

When arriving at the receivers (consignee) facility, a receiving location employee must verify seal integrity and ensure the seal numbers match those on the driver's transport documents. Only the receiving location's designated individual may remove the seals once verified to match the driver's transport documents, and neither Carrier, nor its driver or others, shall remove a seal, except for in the immediate presence of and at the instruction of a receiver.

How To... Successfully Track a Load

1. Make sure that the duty status is dutifully **set to 'On Duty' or 'Sleeper Berth' or 'Driving'.** CarrierLink will NOT track if the duty status is set to 'Off Duty'.

2. CarrierLink will track only when there is an active load assigned to a driver.

- 3. Make sure that the GPS/Location Services are turned ON.
- 4. Make sure that data services are turned ON.
