Preventative Steps to Avoid Cargo Shifting

Carrier and driver are required to have load locks/straps to secure load.

Securing Cargo:

**Order#:**

1107620

Ref#:

1. **Use Straps or Tie-Downs:** Always use strong straps or tie-downs to secure the cargo further. Pass the straps over the top of the cargo and underneath, if possible, creating a crisscross pattern for added stability.
2. **Tighten Straps Adequately:** Ensure that the straps are tightened securely but not excessively, as over-tightening can damage the cargo. Follow the manufacturer's recommendations for the specific straps you're using.
3. **Check for Movement:** After securing the cargo, gently shake or push to confirm that it remains stable. If there's any movement, readjust the strapping as needed.

By following these steps, you'll be able to effectively block and secure your cargo, reducing the risk of damage and accidents during transportation. Proper cargo blocking protects your goods and contributes to overall road safety.
