SERVICE COMMENTS: Driver came in with the complaint of truck having a loss of power and needing a regen. Upon inspection we found that there was a code up for loss of fuel pressure and truck saying it has high soot level. We looked at the fuel filters and found that the filters were full and dirty. We replaced the fuel filters and started the truck. The low fuel pressure code went away. We then had the driver pull the truck outside so we could do a forced regen. We regenerated the truck. It took 58 minutes for the regen to complete. Truck now says it has low soot level. There are no other active codes up. Truck is now complete. \\MMARTIN7\\12/01/2023\\08:08
